

Innopolis Library Media Keeper

Delivery 3

04.04.2018

Introduction to programming II

Delivery tasks

D1

- ☒ Implement **Users** and **Documents** cards;
- ☒ Implement **Booking** system.

D3

- ☐ Implement **Fine** and **Renew** subsystems;
- ☐ Implement **Queues**.

D2

- ☒ Implement actions with cards (modify, delete, add);
- ☒ Implement **Return** system;
- ☒ Implement Storage System;

D4

- ☐ Implement **Search engine**;
- ☐ Everything just works :-)

Goals for this delivery:

☐ Implement **Fine** and **Renew** subsystems;

☐ Implement **Queues**.

Fine system

Now Users get fines if they don't return medias on time. Librarian can't accept return if media is overdue. Every day at 8:00 AM Library system all overdue medias and increases the amount of fine.

Media ID # 1

Type: Book

Title: «War and Peace»

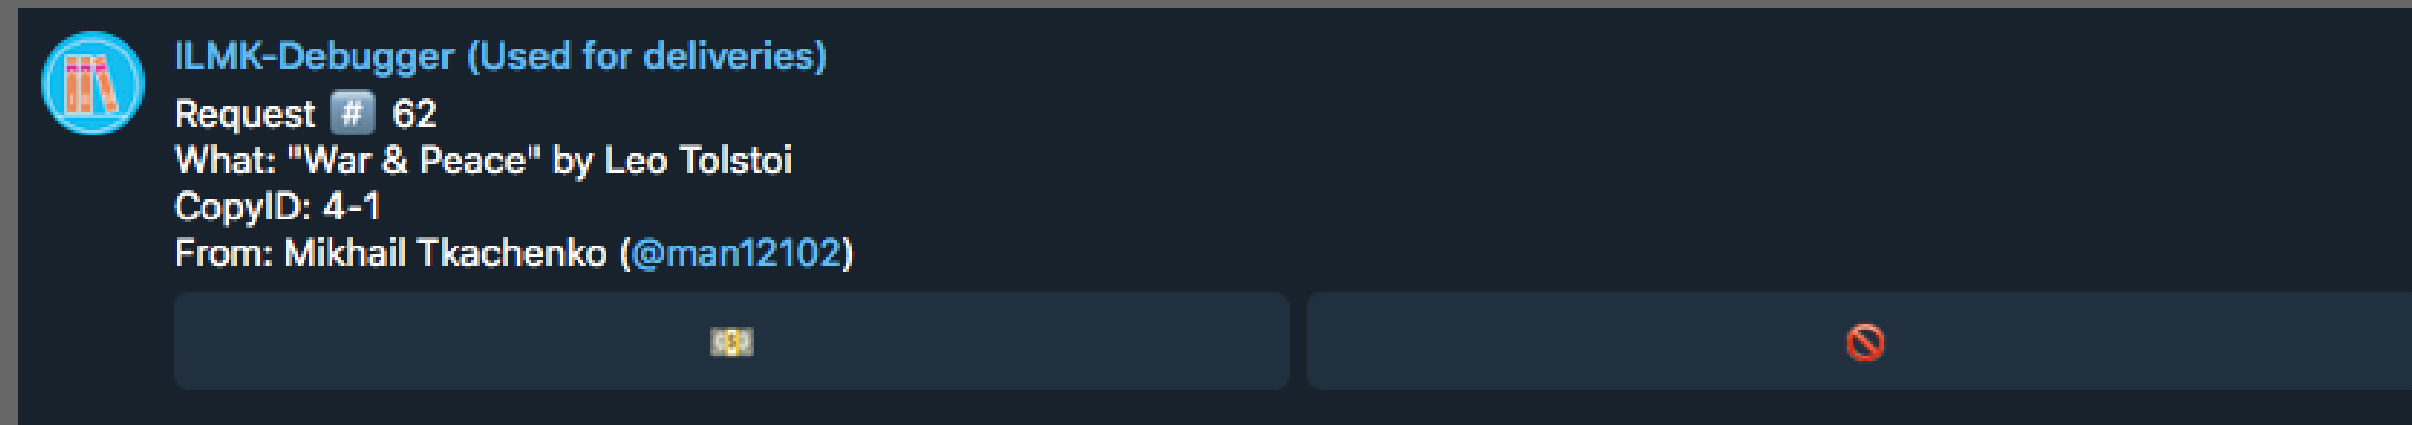

Author(s): Leo Tolstoi

Return: 25 Mar 2018 11:01

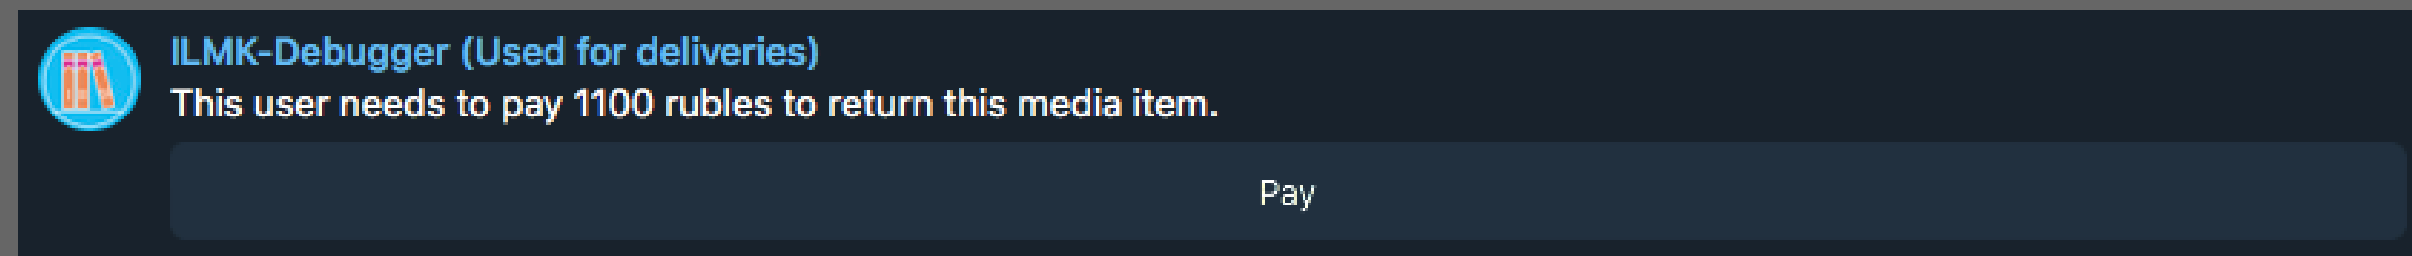

Overdue: 11 days

Balance: 1100 rubles

Pay

Librarian tries to accept Return request.

Librarian gets the notification that User needs to pay a fine because of overdue.

Librarian presses «Pay» button, which means that Librarian got the money and fine is returned. Now Librarian can accept Return request.

Renew system

If user wants to keep the book for more weeks, this can be done by «Renew» button. Return date becomes shifted by the delta between issue date and current date.

Media ID # 1

Type: Book

Title: «War and Peace»

Author(s): Leo Tolstoi

Return: 25 Apr 2018 11:01

Return

ILMK-Debugger (Used for deliveries)

Your media # 4-1 :

What: "War & Peace" by Leo Tolstoi

Issue date: 04 Apr 2018, 09:56

Expiry date: 25 Apr 2018, 12:56

Return

Renew

User may renew their Medias

Innopolis University Media Keeper, Spring 2018 semester

Goals for this delivery:

☒ Implement **Fine** and **Renew** subsystems;

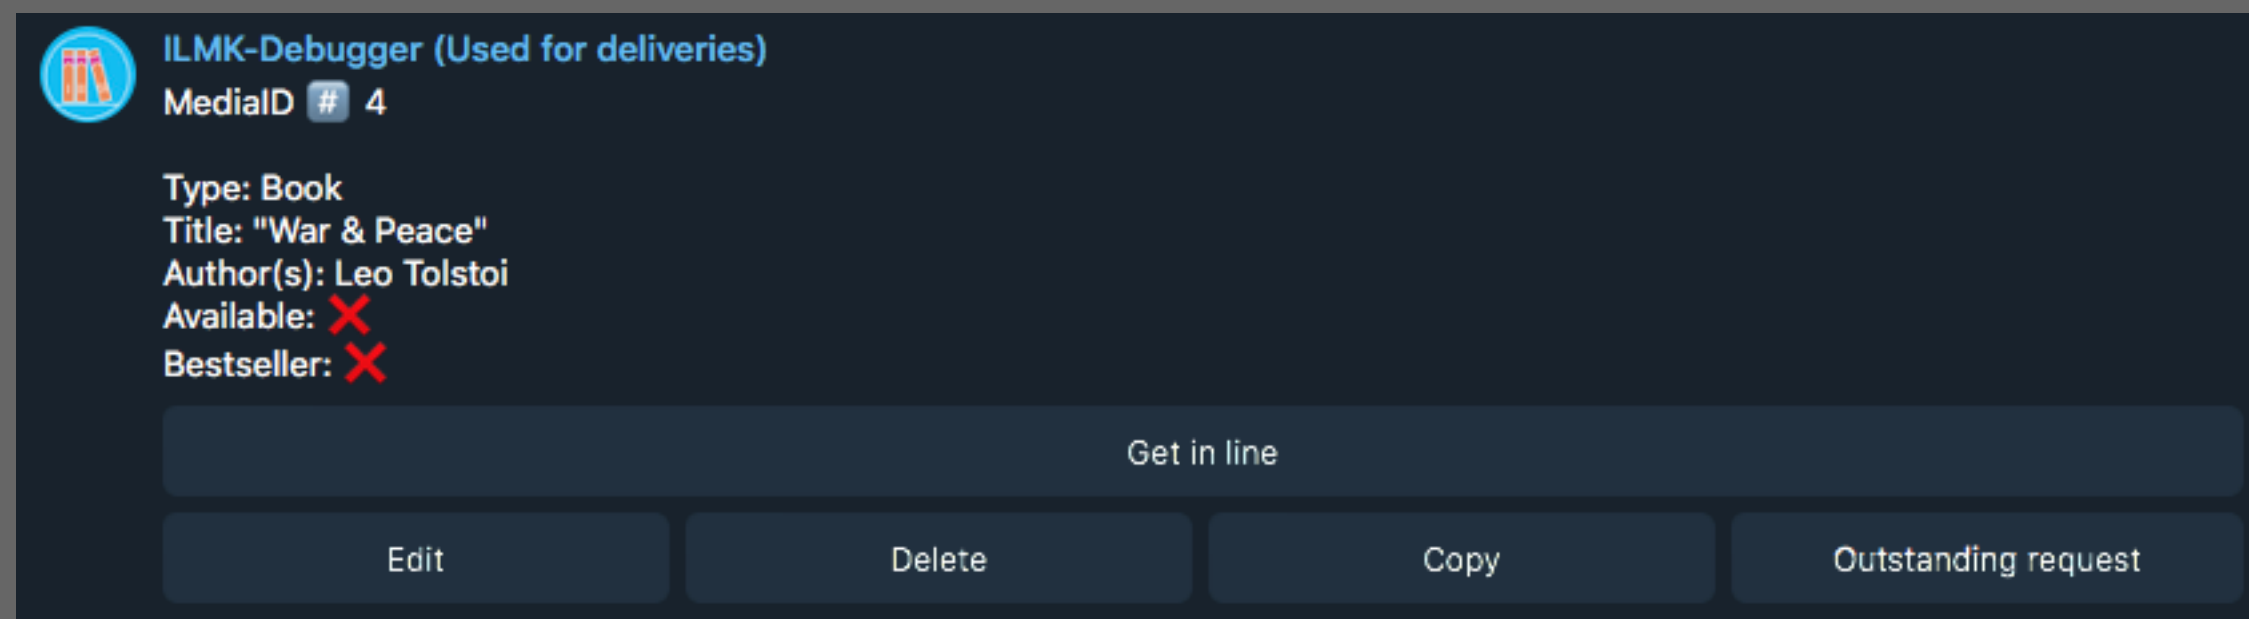

☐ Implement **Queues**.

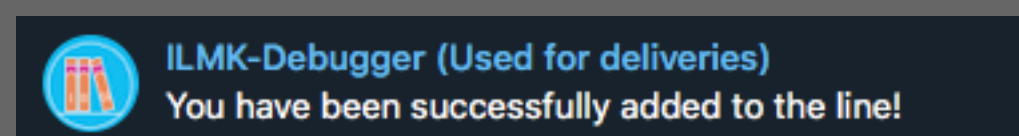

Queues

If Media is not available, User can get in a line for this media. It gets sorted by the priority of Users. If Media becomes available, first user in a queue gets a notification that it becomes available now.

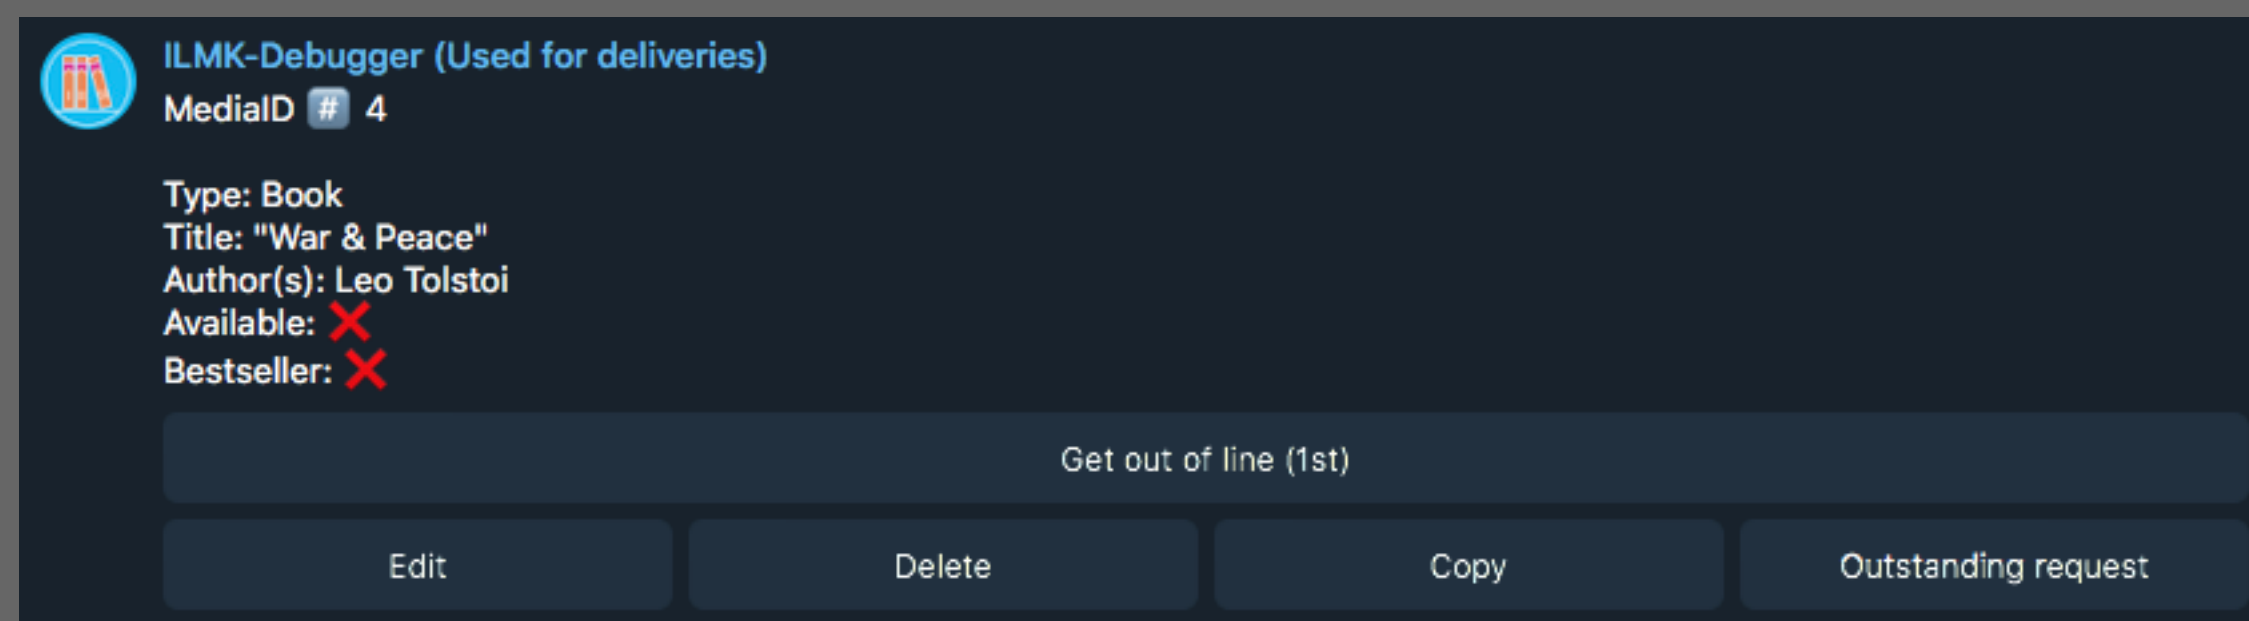

User can't book Media. User may get in line.

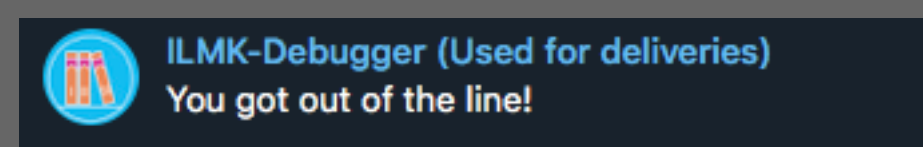

User gets notification that they are in line now.

User can get out of line. User also can see their number in line.

Librarian can make an Outstanding request.

User gets notification that they are out of line now.

Goals for this delivery:

☒ Implement **Fine** and **Renew** subsystems;

☒ Implement **Queues**.

Tests

All tests are successfully passed. Now they are easier to execute because of code optimization.

Passed tests:
All

Thank you for attention!
See you next delivery :-)
