

Innopolis Library Installation Guide

Here you can find a guide about how to run ILMK on your computer.

*** Please, know that GitHub doesn't include config.py file with all the keys to database and bot token. It can be found in Moodle archive**

1. Install PyCharm IDE from here: <https://www.jetbrains.com/pycharm/>
2. Create a new project and import everything which is inside zip file from Moodle
3. Go to Preferences (Settings) → Project preferences → Project Interpreter. Double-click one of the packages, then search and install the following plugins:
 - a. python-telegram-bot
 - b. pymysql

About PyCharm
Check for Updates...

Preferences... ⌘,

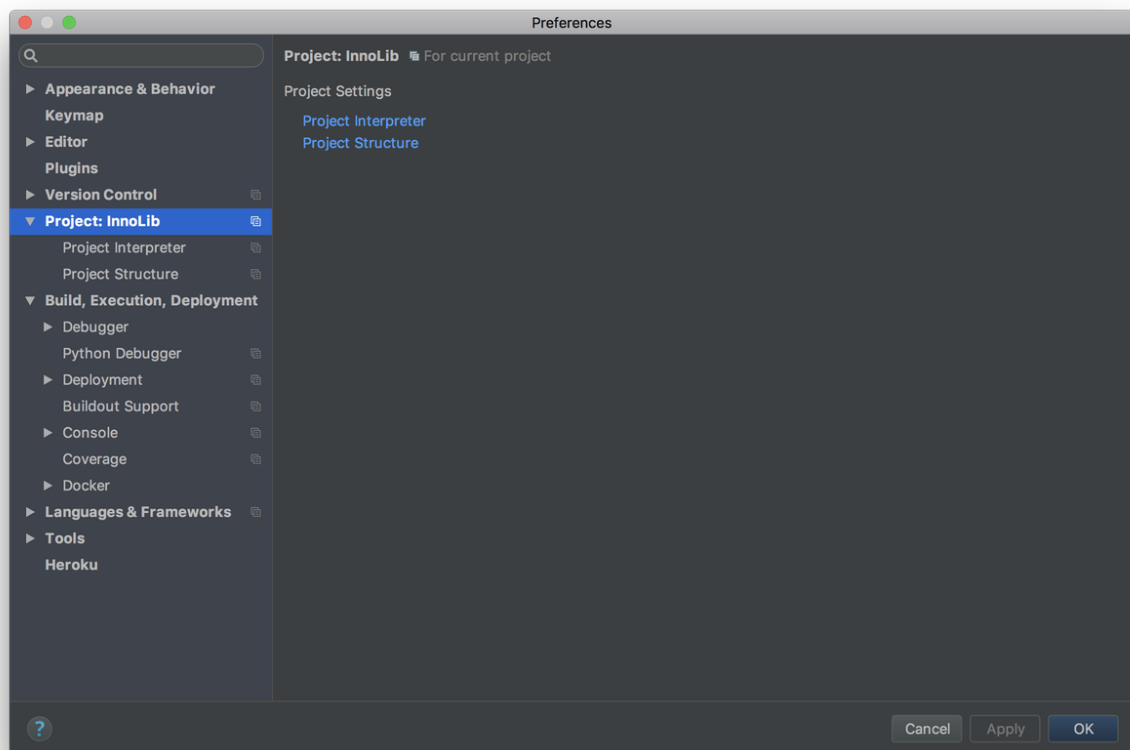

Services ▶

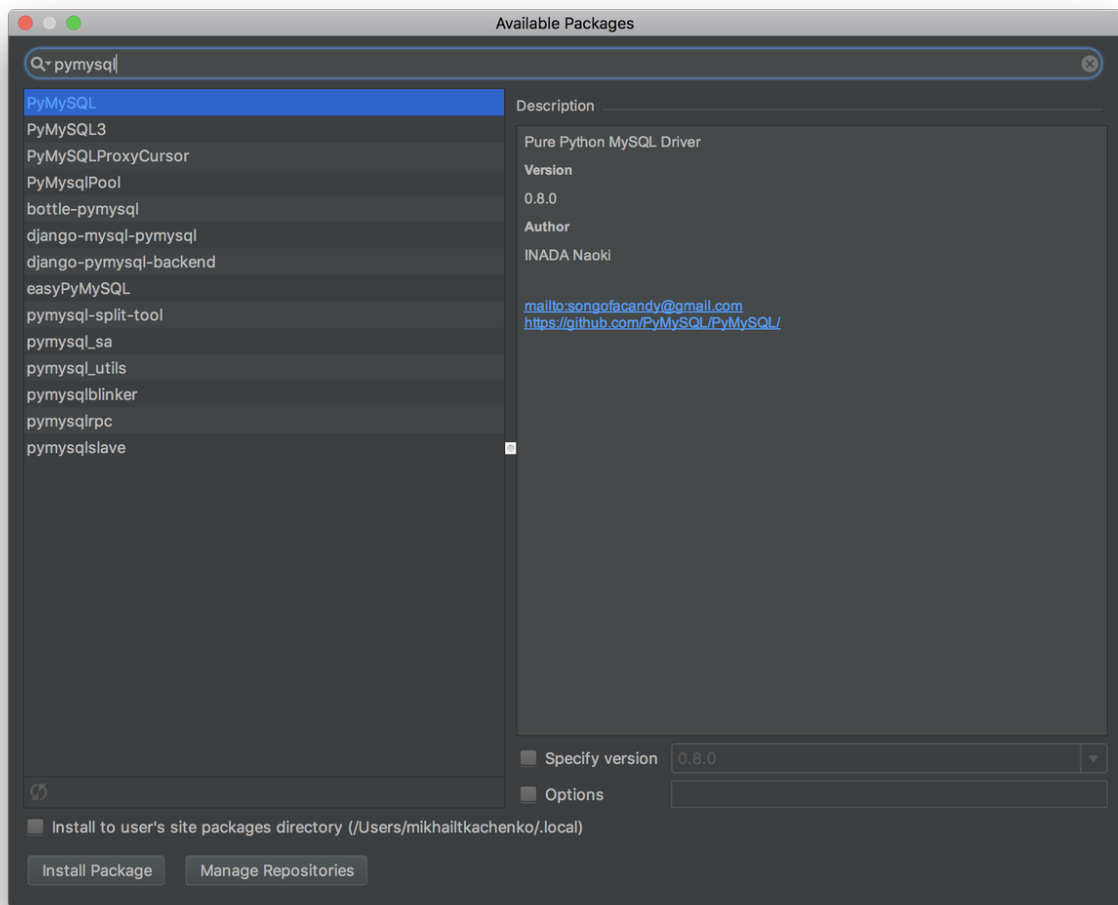

Hide PyCharm ⌘H

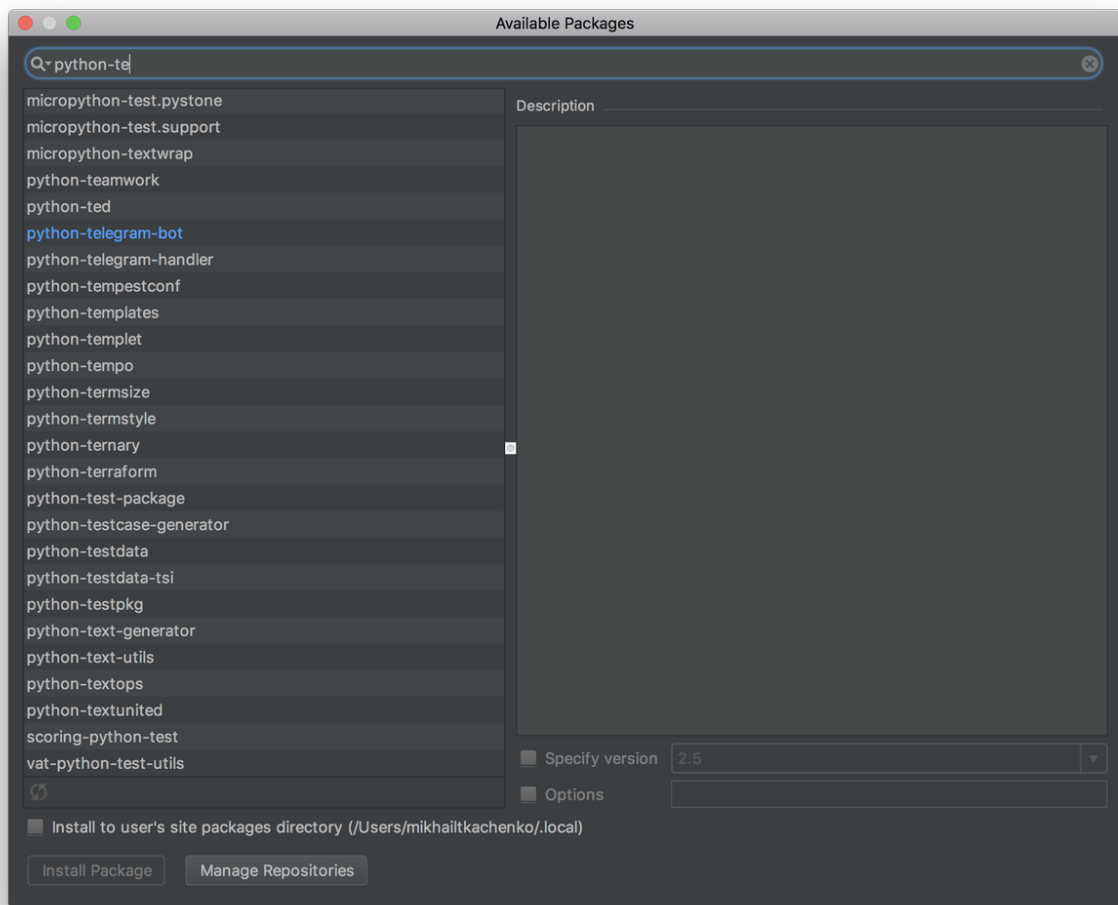

Hide Others ⌘⇧H

Show All

Quit PyCharm ⌘Q

4. Congratulations! You can run the project!
